

**HYDROPOWER PROJECTS
IN MAINE**

JANUARY 1, 2004

HYDROPOWER PROJECTS IN MAINE

This report presents information on all hydropower projects affecting lands and waters within the State of Maine. The information contained herein has been compiled from various public records and personal contacts as a planning and tracking tool for use by state resource agencies and other interested groups and individuals. While every effort has been made to insure that the information present is accurate and complete, this report may contain unintended errors.

This report contains the following lists of projects:

- FERC Approved Hydropower Projects in Maine
- Inactive FERC Hydropower Projects in Maine
- FERC Non-Jurisdictional Hydropower Projects in Maine

Please direct any comments or questions regarding this report to:

Dana Murch
Dams & Hydro Supervisor
Department of Environmental Protection

SUMMARY OF HYDROPOWER PROJECTS AS OF JANUARY 1, 2004				
	PROJECT COUNT	PRE-1979 CAPACITY (KW)	POST-1979 CAPACITY (KW)	TOTAL INSTALLED CAPACITY (KW)
FERC APPROVED PROJECTS	104	535,662	206,655	742,317
FERC NON-JURIS- DICTIONAL PROJECTS	14	23,980	0	23,980
TOTALS	118	559,642	206,655	766,297

NOTES FOR JANUARY 1, 2004 REPORT

1. Several projects included in this report, while utilizing dams and/or impoundments located within the State of Maine's boundaries on the Salmon Falls River and the Androscoggin River, are actually generating power in New Hampshire. These projects are identified by an asterisk (*) following the FERC project number.

2. All approved capacity is constructed and on-line, except as noted below.

3. The following approved expansions have not been completed: Weston Project, No. 2325 (1980 KW); Abenaki Project, No. 2364 (2,940 KW); Livermore Project, No. 2375 (1,000 KW); Veazie Project, No. 2403 (8,000 KW); Milford Project, No. 2534 (1,600 KW); and Swans Falls Project, No. 11365 (470 KW).

4. The Orono Project, No. 2710, and Union Gas Project, No. 2556, are currently inoperable and are shut down.

5. The Abbots Mill Project, No. 8505, and Gilman Stream Project, No. 7473, are currently shut down for economic reasons.

6. The following existing project is currently pending for initial licensing: Burnham Project, No. 11472 (1,000 KW). This capacity is not counted in the summary table above.

7. The following projects are currently pending for relicensing and are operating under annual licenses: Harris, No. 2142; Gulf Island/Deer Rips, No. 2283; Great Works, No. 2312; Flagstaff, No. 2612; West Branch Storage, No. 2618; Great Northern Storage, No. 2634; Forest City Storage, No. 2660; Howland, No. 2721.

8. In response to a petition for declaratory order, the West Branch Storage Project, No. 2618, and Forest City Storage Project, No. 2660, have been found to be jurisdictional by FERC. A court appeal of this decision is currently pending.

9. The Fort Halifax Project, No. 2552 (1,500 KW) is currently pending for surrender of license and partial dam removal.

FERC APPROVED PROJECTS

FERC approved hydro projects operate under the terms of a license or an exemption.

LICENSE (L): Licenses are issued under the Federal Power Act for the development or continued operation of non-federal water power projects. Licenses are valid for a maximum of 50 years. Under FERC's regulations, a licensee must file to relicense a project no later than 2 years prior to the license expiration date. When a license expires, FERC may deny license renewal, may issue a new license to the original licensee or a new licensee, or may recommend to Congress that the United States acquire the project. If action has not been taken by the license expiration date, the project will operate on an annual license until relicensing action is taken.

EXEMPTION (E): Exemptions from the licensing provisions of the Federal Power Act are issued in perpetuity for the development of non-federal water power projects having a capacity of 5,000 KW or less and utilizing an existing dam or natural water feature. Exemptions are subject to conditions imposed by fish and wildlife agencies

INACTIVE FERC PROJECTS

Inactive FERC hydro projects are projects that at one time were approved by FERC but for which renewal of the project license has been subsequently denied or the project license or exemption has been subsequently revoked, surrendered or otherwise terminated. In most cases, the approved project was never built. In a few cases, a previously constructed and operating project has been shut down due to economic or environmental considerations.

FERC NON-JURISDICTIONAL PROJECTS

Non-jurisdictional projects are those that have been found to not be subject to FERC jurisdiction under the terms of the Federal Power Act.

A non-federal hydroelectric generating project must be licensed if it: (1) is located on a navigable water of the United States; or (2) occupies land of the United States; or (3) utilizes surplus water or water power from a government dam; or (4) is located on water which are non-navigable but over which Congress has Commerce Clause jurisdiction, project construction occurred on or after August 26, 1935, and the project affects the interests of interstate or foreign commerce.

FERC jurisdiction does not attach if a project is constructed, operated and maintained in accordance with the terms of a valid federal permit issued prior to June 10, 1920.

A storage reservoir is subject to licensing if it is part of a complete unit of hydropower development and any part of the development is subject to licensing.

NOTES

- ① Lewiston Falls (Canal System), FERC No. 2302: The 450 KW Bates No. 2 station was retired in 1998.
- ② Penobscot Mills (Millinocket), FERC No. 2458: In 1994, the five hydromechanical turbines (rated at 29,750 horsepower) used to power wood-pulping operations at the Millinocket Mill were converted to electric generation (rated at 22,000 KW).
- ③ Cataract (West Channel), FERC No. 2528: The 900 KW NKL station at the West Channel Dam was retired in 1997.
- ④ West Enfield, FERC No. 2600: The 3,500 KW Stanford Station was retired and removed in 1988.
- ⑤ Hydro-Kennebec, FERC No. 2611: The old powerhouse, with 3,730 KW installed capacity, was retired in 1998.
